

ALCOHOL & DRUG TESTING SERVICES

Family Service, Inc. has two Department of Transportation (DOT) qualified Urine Specimen Collectors on staff. The agency internally tests all DOT Qualified employees who have tested positive on a work related Alcohol or Drug Screen as part of the DOT assessment and prior to the Return to Duty (RTD) evaluation. This ensures that employees assessed by Family Service do not return to the work place while still positive for alcohol or drugs.

In addition to the DOT testing, Family Service staff will test individuals or provide testing for companies who are in need of testing services. Rates for these services are negotiated according to the volume of tests conducted for an individual or employer.

Testing services are also provided to children, adolescents and adults who may be struggling with sobriety and want a confidential, yet reliable tool for identifying substances in individuals. This can be a useful tool in families who have children or spouses who are struggling with addiction and need incentive to remain clean and sober.

Tests are provided during regular office hours, and same day appointments are available.
